schools, hotels, casinos, catering companies and service industries.

What we do

i-learn Australia provides simple and robust training and content solutions for mobile devices such as PDA's and Smartphones

We can provide your organisation with expert advice and assistance to develop solutions for your mobile training needs.

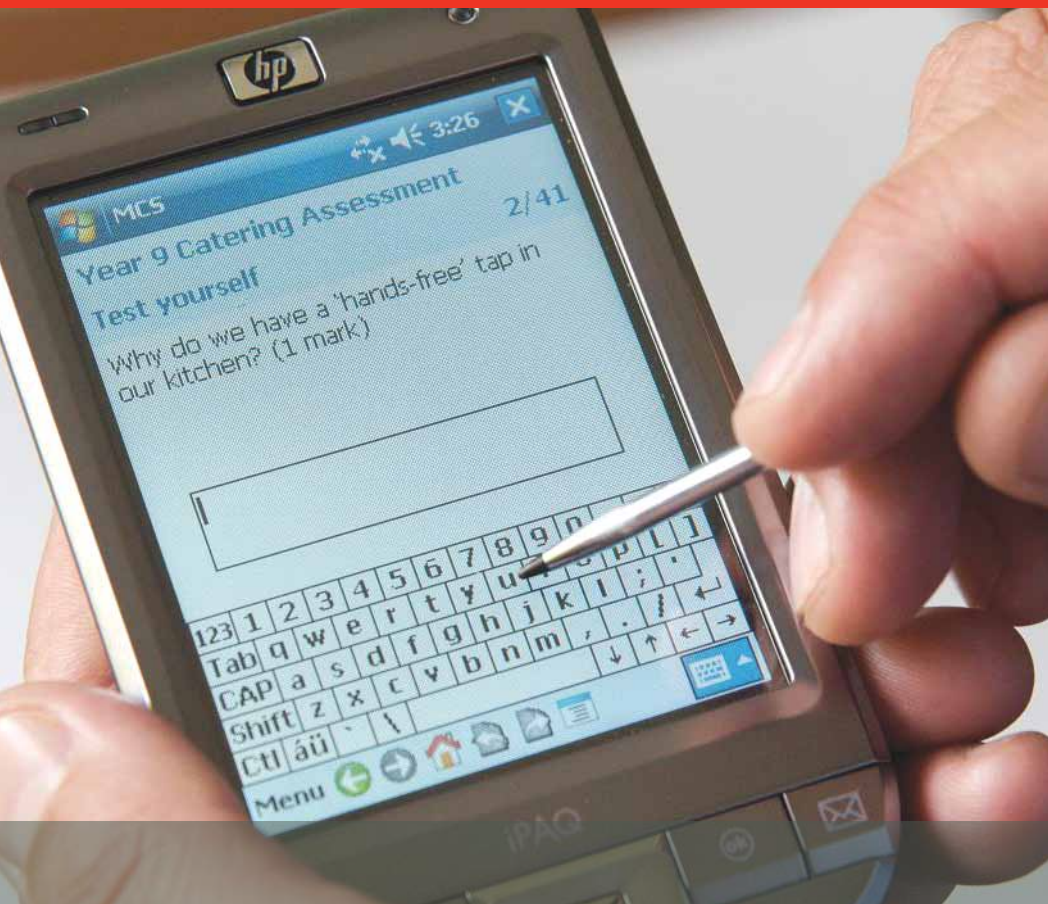

We believe that our proprietary authoring tool is the key to delivering your mobile solutions - on time and on budget

From small business through to multinationals, schools, training organisations and universities.

If you need to get content distributed to mobile devices... we can help.

"mcs – mobile content shell"

Features of "mcs"

- Fully customised content delivery modules
- Assessments sent to existing Learning Management System (LMS) or email address
- High quality video, audio and images
- Existing in-house content can be developed through cut and paste
- Content can be UPDATED rapidly using Wifi, Bluetooth, USB synchronising or Internet access
- Quick, cost effective and professional presentation
- Supported formats include - wmv, wma, mpeg, mp3, jpg, gif, png, swf

We have developed our own proprietary authoring tool called the "mcs" – mobile content shell.

This allows ANYONE to develop and download ANY type of content to PDAs and SMARTPHONES

The content includes – text – audio – images – videos – assessments – captioning – sign language

You DO NOT need to have any I.T. knowledge to produce content.

There is no need to use expensive production houses to develop multimedia content.

Users DO NOT need to have continuous internet access to interact with the content on the devices.

The content can be used in ANY location, at ANY time by ANYONE.

If you can put together a WORD document then you can use the "mcs"

To discuss the "mcs" and your mobile content needs:
